Nevada Department of Education Update

The Office of Standards and Instructional Support began facilitating the re-write of the Nevada Academic Content Standards for Health in January 2019. We have completed the public comment process and would like to extend our gratitude to those who provided feedback during this process. The feedback gathered was extremely helpful in fine-tuning our standards.

The Nevada Department of Education (NDE) is on track to present the proposed 2020 Health Standards to the Academic Standards Council in mid-September of this year. If the Council approves the proposed 2020 Health Standards, NDE will aim to present them to the Nevada State Board of Education in November 2020 for possible adoption.
